

## Patient questionnaire before MRI examination

\_\_\_\_\_  
(patient's first and last name, personal identification code)

\_\_\_\_\_  
(date, time)

Please answer the following questions:

<b>ABSOLUTE CONTRAINDICATIONS</b>	<b>YES</b>	<b>NO</b>
Cardiac pacemaker		
Transplanted neurotransmitter		
Implanted drug pump		

<b>RELATIVE CONTRAINDICATIONS</b>	<b>DATE OF IMPLANTATION</b>	<b>YES</b>	<b>NO</b>
Hearing implant			
Brain aneurysm clips			
Aortic clips			
Joint prosthesis, plates, screws in bones			
Non-removable dentures (metal teeth, bridges, posts)			
Gunshot injuries (bullet, shell fragments, metal debris)			
Tattoo			

Pregnancy		
-----------	--	--

Body weight	kg
Height	cm

I confirm the accuracy of the information provided regarding my health.

**PLEASE NOTE: Please make sure that you do not bring the following items into the examination room:**

- **WALLETS, MAGNETIC STRIPE CARDS** (credit cards, bank cards, etc.)
- **JEWELLERY, HAIR CLIPS, HAIR TIES, DENTURES, CONTACT LENSES**
- **WATCH, MOBILE PHONE, POCKET KNIFE, E-CIGARETTE, CAMERA, SCISSORS, GLASSES, KEYS**

## Consent for MRI

Magnetic resonance imaging (MRI) is a diagnostic method that uses a strong magnetic field to obtain two- and three-dimensional images of different areas of the body. MRI does not use X-rays.

When coming to the examination, please wear comfortable clothing without any metal parts (zippers, hooks, buttons). If necessary, we will provide you with disposable clothing. Metal jewellery, watches, dentures, mobile phones, and magnetic cards are not allowed in the examination room. You can store these items in the changing room.

Do not use hairspray, mascara or excessive make-up (especially if your head will be scanned) on the day of the examination.

The duration of the scan ranges between 20 to 60 minutes, depending on the area being examined. During this time, you must lie still on the examination table. A coil will be placed around the scanned area, and your position will be supported with cushions. You will then be moved into the MRI tunnel (diameter 80 cm), which is well-lit and open at both ends. The MRI machine will make loud sounds of varying intensity, so you will be given earplugs or headphones. You will also be given a safety button, which you can press to alert staff if you start to feel unwell. If necessary, the scan will be stopped. After the scan, you can leave and resume your normal daily activities. A radiologist will analyse the images and forward the result to your doctor.

If your examination requires the injection of a contrast agent, the radiology technician will insert a venous cannula before the scan to administer the contrast agent. The contrast agents are generally well tolerated and complications such as headaches are rare and not serious. You can continue taking your everyday medications and there are no restrictions on your diet. It is recommended to drink more fluids on the day of the scan and the following day.

**PLEASE ARRIVE AT LEAST 10 MINUTES BEFORE YOUR APPOINTMENT!  
IF YOU ARE LATE, PLEASE RESCHEDULE THE APPOINTMENT BY CALLING THE  
RADIOLOGY RECEPTION AT 45 20 020 TO BOOK A NEW TIME.**

**If you have any questions about the examination or if you need to reschedule the appointment, please contact the MRI cabinet at 45 20 083 or the radiology information line at 51 08 206 as soon as possible.**

**I hereby confirm that I have read and completely understood the information provided in this document. I am aware of the nature of the MRI examination and its potential risks. I consent to the administration of the contrast agent if this is medically required. Before giving my consent, I received satisfactory answers to all of my questions about the procedure and the accompanying risks and complications.**
